

Book launch: Border Carbon Adjustments and Climate Clubs - In the EU context

STOCKHOLM, 12.00-13.00

ABOUT THE EVENT

Common problems for national and regional policy interventions against carbon emissions include the free-riding problem and the risk of carbon leakage. In “EU’s climate policy and trade - the rationale for border carbon adjustments and climate clubs”, the author Rikard Forslid discusses border carbon adjustments (BCAs) and climate clubs as policies to tackle these risks and to level the playing field for foreign and domestic firms within the EU market. Fores invites you to the book launch webinar of *EU’s climate policy and trade - the rationale for BCA:s and climate clubs*, where we together with a panel of experts discuss the terms, policy suggestions and what role BCAs and climate clubs could have in future climate work.

EVENT SCHEDULE

NOVEMBER 24TH

- 12:00** Introduction
